

Privacy Policy

When you download SDS.Dental, we may record your WAN IP address. We do this so that we can build a map of where SDS.Dental is being used.

When SDS.Dental runs, it sends a periodic health report to our support servers. This information contains your installation id, information about the SDS.Dental instance. We use this to track the recent health of the system so that we can have some idea of how the system has been doing when there is a support issue. This can be turned off in the Administration pages.

When SDS.Dental runs, it sends anonymous usage information so that we know which features are being used in the field. This can be turned off in the Administration pages.

Remember that you can always disable outbound traffic from SDS.Dental to our servers via your Operating System Firewall.
